## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-18 are allowed.
2. The following is an examiner's statement of reasons for allowance:

\* The Board of Patent Appeal and Interferences has reversed the Examiner's Rejection on Decision On Appeal mailed 9/9/2005;

\* The present invention provides a new method and system for compressing and decompressing image data that at least double the spatial resolution for non-continuous tone data while maintaining adequate spatial resolution for continuous tone data and minimizing the amount of memory and corresponding transmission bandwidth requirements; that store extra resolution in frequency spatial resolution direction of non-continuous tone data to improve the appearance of an image rendered using the data; that eliminate spatial resolution mismatch between data used to render continuous tone regions and data used to render non-continuous tone regions; that provides the necessary information to provide high spatial resolution non-continuous tone data and low spatial resolution continuous tone data as compressed data; and that increase non-continuous tone data spatial resolution; and that render gray level information for two non-continuous tone pixels in a single byte (see specification, page 3, lines 4-24).

Particularly, the new method and system comprises the following features, which the prior art taken either singly or in combination does not teach:

- compressing image data by discarding pixels along a direction parallel to an edge while maintaining pixels along a direction perpendicular to the edge (see independent claims 1, 13 and 15);

- referencing a segmentation bit... indicative of the second pixel (see independent claim 7);

- synthesizing... by the direction bit of that bit word (see independent claim 10);

- synthesizing... to render the vertical edge (see independent claim 11);

- synthesizing... to render the horizontal edge (see independent claim 12).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
